

Hexafly Insect Protein

Hexafly insect protein is a sustainable protein feed ingredient with an advantageous breakdown of essential amino acids.

It is highly digestible for both animal and aquaculture species and outperforms animal derived and less sustainable poultry meal and fish meal.

Hexafly insect protein is a dry, powder product made from the larvae of the black soldier fly.

It is a natural, nutritious ingredient that can be used as a feed source for the aquaculture, poultry feed and pet food industries.

Hexafly insect protein can compete nutritionally with the industry standard feed but is superior in its production efficiency and sustainability.

Product Safety

Hexafly insect protein is in full compliance with all current regulations on animal and fish feed safety.

Storage

Store below 25°C in a moisture free environment and away from direct sunlight.

Hexafly insect protein has a shelf life of 12 months when stored in the correct conditions.

Packaging

Bulk bags. Other packaging options may be available upon request.

Hexafly Insect Protein

Nutritional Profile*

Protein 56.5%

Oil 8.5%

Fibre 12.5%

Ash 8.5%

Dry matter 97.5%

Moisture 2.5%

*Hexameal nutritional profile is consistent however regulations allow for variation +/-3%

Amino Acid Profile

(percent of total)

Alanine 3.32

Arginine 2.63

Aspartic acid 4.99

Cysteine 0.43

Glutamic acid 6.22

Glycine 2.88

Histidine 2.07

Isoleucine 2.34

Leucine 3.49

lysine 3.39

Methionine 0.98

Phenylalanine 2.13

Proline 2.93

Serine 2.50

Threonine 2.16

Tyrosine 3.74

Valine 3.27
